
Manufacturer Declaration

on articles intended for food contact

We hereby declare that the food contact materials of the articles to which this declaration relates are fundamentally in accordance with **Regulation (EC) No. 1935/2004** of the European Parliament and of the Council.

In accordance with the requirements of the (EC) Regulations No. 1935/2004 and 2023/2006 we restrict ourselves by purchasing raw materials intended to be used for parts that may come into contact with food exclusively from recognized suppliers and always together with an appropriate material certificate. We also understand the importance of traceability of components and sub-assemblies coming into contact with food throughout our manufacturing process. This is guaranteed by our quality management system according to ISO 9001.

Therefore, we as a manufacturer declare that the wetted parts of the Bronkhorst ES-FLOW™ Low Flow Ultrasonic Flow Meters/Controllers made from stainless steel of grade 1.4404 (AISI 316L, X2CrNiMo17-12-2) and 1.4435 (AISI 316L, X2CrNiMo18-14-3) completely fulfill the requirements of the Regulation No. 1935/2004 and hence may be used in processes where sensors come into direct contact with food.

This applies to the following article(s):

- **ES-FLOW™ series: ES-103I/113I**

To ensure that there is no unintentional contamination through transport, installation or mounting, a rinsing with aqueous medium is recommended before the first contact with the food.

Always use a suitable process seal that meets the product-specific requirements.
